

Geological Short Course, North Rim/RESPEC

The SK Geological Short Course is an interactive digital platform that provides baseline information on the province's geology, stratigraphy and commodities, scalable to various educational levels for technical or non-technical audiences. The course materials are suitable for lecture-style implementation as well as self-directed learning. This course could be incorporated into K-12 curriculum and in post-secondary institutions teaching earth sciences and mining in Saskatchewan. Other potential audiences include mining professionals, technical professionals and non-technical professionals working in the Saskatchewan mineral industry, or any other group of individuals directly or indirectly affiliated with the mining industry.

With support from the International Minerals Innovation Institute ([iMii](#)), North Rim/[RESPEC](#) has developed the following geological short courses:

- Saskatchewan Resources Overview
- Introduction to Saskatchewan Potash
- Introduction to Saskatchewan Uranium

Access to the short courses can be found on North Rim's website at www.northrim.ca/news-and-events.
