

# Operationalizing Innovations Preliminary Project Proposal

**Title of Proposal:**

**Date of Submission:**

**Primary Contact:**

**Contact Information:**

**Phone:**

**E-mail:**

**How does the Proposed Innovation Relate to IMII Areas of Focus (select all that apply):**

Exploration

Development

Extraction / Production

Closure / Reclamation

Workplace Health & Safety

Environmental Performance

Sustainability

Efficiency / Optimization

**Types of Funding Applied For:**

New product research and development, leading edge design, engineering and prototype development, and/or advanced product testing and refinement

Technology optimization critical for market acceptance, manufacturing of a prototype for demonstration, testing of a prototype in an operational environment, and/or results assessment/verification of technical data

**Preliminary Funding Requirements:**

Estimated total project budget:

Initial funding requested:

Estimated cash or in-kind contribution from project proponent:

Cash contribution:

In-kind contribution:

Project Start Date:

Project End Date:

**At least two IMII minerals company members as sponsors (provide company names):**

**At least one Saskatchewan-based OEM or SME as a development partner (provide company name(s)):**

**Project Summary:**

Please briefly describe the proposed project/innovation. Identify where possible the:

- Overall scientific and/or technical merit of the proposed innovation;
- Approach to proof of concept or technological advancement;
- Economic, environmental or social (including safety) potential of the innovation; and
- "Rapid deployment" potential for the potash and/or uranium sectors.

**Proponent Information:**

Briefly describe you or your team's capabilities and related experience.
