IMII School of Mining

An Immersive Introduction to Mining

June 23 – 25, 2026

The Willows Golf & Country Club | 382 Cartwright Street, Saskatoon

Lorne Schwartz, P.Eng., PMP

Lorne has 30 years of mineral processing experience in uranium, potash, base metals and rare earth elements. He started his career in copper and lead/zinc operations in British Columbia. He moved to Saskatchewan for commissioning and early operation of Orano's McClean Lake uranium mill. Next, Lorne spent a decade with Cameco in operations roles at Rabbit Lake and as chief metallurgist at head office. Since then, he's been engaged in process design for uranium and other commodities. Currently, he is at Wood's Saskatoon office. Recent solution mining work includes advancement of the Denison - Wheeler River Phoenix deposit from feasibility to construction, as well as international projects.
