

# IMII School of Mining

## An Immersive Introduction to Mining

June 23 – 25, 2026

The Willows Golf & Country Club | 382 Cartwright Street, Saskatoon

### Melanie Lalonde, P.Eng.

Melanie is a Mechanical Engineer and the Global Director of Project Development in the Metals sector at Hatch, with over 20 years of experience delivering complex mineral and metallurgical projects worldwide. Her expertise spans the full project lifecycle—from early concept and feasibility studies through detailed design, procurement, and execution—across commodities including copper, nickel, gold, uranium, and potash.

Melanie has held progressive project roles from design engineer to project manager, contributing to major international projects in North America and globally. A Professional Engineer in Ontario, she brings deep technical knowledge combined with practical project delivery experience, offering a well-rounded perspective on successfully developing and executing mining and metals projects.
